Helicopter loading

Preparation, securing and ship loading

Valparaíso · April 2024

An independent report documents the preparation of a helicopter for maritime transport in Valparaíso. Its photographs and notes record a sequence carried out between 22 and 24 April 2024.

01

Preparation

Removal of rotor blades and protection of components.

02

Securing

Positioning on a platform and securing the cargo.

03

Loading

Transfer to the terminal and lifting into the vessel's hold.

This sequence describes the source document. No unverified commercial route, destination, client, cargo weight or contractual scope has been added.
